

# Resilient Infrastructure for Adaptation and Vulnerability Reduction

2022 - 2028

**World Bank**  
Bangladesh

---

## NATURE BASED SOLUTIONS

forests, grassland and other vegetation

The Resilient Infrastructure for Adaptation and Vulnerability Reduction Project aims to reduce vulnerability to riverine and flash floods in targeted communities and enhance disaster preparedness. The project supports afforestation activities, including planting trees and grass, to reinforce soil, reduce surface run-off, and improve resilience to flood risks.

---

## INTERVENTION

Hybrid

## HAZARD

river flooding  
landslides & erosion

## SCALE

National

## RISK REDUCTION BENEFITS

reduce flood risk, erosion control and slope stabilization
