

Local Forest Communities Support Project

2016 - 2021

World Bank

Burkina Faso

NATURE BASED SOLUTIONS

forests

The objective of the Local Forest Communities Support Project was to strengthen the capacity of targeted local communities in Burkina Faso to participate in REDD+ programs at local, national, and global levels. The project supported training in leadership, conflict resolution, and capacity-building for customary land tenure and traditional forest management systems. Sub-grants facilitated activities to improve livelihoods and supported reforestation efforts, contributing to the restoration or reforestation of 34,000 hectares of forest.
