

Ma'anshan Cihu River Basin Improvement Project

2013 - 2021

World Bank

China

NATURE BASED SOLUTIONS

watershed management, rivers & floodplains

The Ma'anshan Cihu River Basin Improvement Project in China aims to improve drainage and flood protection capacity in urban areas of Ma'anshan municipality. Key components include river rehabilitation, drainage improvement, restoration of natural storm drainage, water quality monitoring, and capacity building for project implementation and management.
