

Niger Community Action Project for Climate Resilience

2012 - 2021

World Bank

Niger

NATURE BASED SOLUTIONS

grassland and other vegetation, forests

The Niger Community Action Project for Climate Resilience aims to improve the resilience of populations and production systems to climate change in targeted Communes. The project focuses on mainstreaming climate resilience into development strategies, integrating resilience practices into agro-sylvo-pastoral systems, and ensuring effective coordination and monitoring of project activities. These interventions aim to enhance adaptation to climate variability and protect vulnerable communities.
