

Sustainable Forest and Landscape Management Project

2014 - 2019

World Bank

Bosnia and Herzegovina

NATURE BASED SOLUTIONS

forests, grassland and other vegetation

The Sustainable Forest and Landscape Management Project in Bosnia and Herzegovina aims to build capacity among forestry sector stakeholders and demonstrate sustainable forest and land management approaches. Activities include reforestation of fire-affected sites, participatory landscape management, and capacity building to enhance sustainability and resilience of vulnerable forest, scrub, and pasture landscapes.
