NATURE BASED SOLUTIONS

Policy Development and Reform

The development objective of Gujarat Resilient Cities Partnership : Ahmedabad City Resilience Project for India is to strengthen institutional, financial and service delivery performance in Ahmedabad. This project has three components. 1) The first component, Strengthening AMC's institutional and financial systems has the following sub-components: (i) Improving municipal revenue performance; (ii) Land-based financing; (iii) Strengthening AMC's institutional systems for service delivery; (iv) Integrated GIS-based system for urban management, financing, and service delivery; (v) Strengthening the municipal financial management system; and (vi) Climate-smart CIP system. 2) The second component, Improving wastewater management services, has the following sub-components: (i) Developing resilient and efficient wastewater treatment systems; (ii) Improving wastewater network systems including household connections; (iii) Wastewater recycling and reuse for circularity and resource efficiency; (iv) Industrial pollution abatement in Ahmedabad's wastewater systems; (v) City-wide integrated digital monitoring and control systems. 3) The third component, Developing state level institutional systems and capacities, has the following sub-components: (i) Developing state-level systems and urban knowledge ecosystem for emerging cities; and (ii) Technical support for project implementation and management. The program will strengthen

planning and support preparatory activities for stormwater management with a specific focus on adopting integrated NBS.
