

Enhancing Landscape and Ecosystem Management (ELEMENT) Project

2025 - 2030

World Bank

India

NATURE BASED SOLUTIONS

forests, grassland and other vegetation, watershed management

The project will improve integrated landscape management and ecosystem services and increase benefits for targeted forest-dependent communities in Tripura and Nagaland. It finances restoration of degraded forests, agricultural lands, and wetlands; soil and water conservation; afforestation and agroforestry; climate-smart agriculture; enhanced biodiversity conservation; and community-led landscape planning and value-chain development for forest-based livelihoods. Institutional capacity building of state agencies and community institutions (JFMCs/VMCs) and a Contingent Emergency Response Component support resilience to climate shocks and sustainability of outcomes
